AutoCAD Architecture 2020 enables you to create sophisticated 2D and 3D models that are ready for architects and designers. Best of all, the architecture of your model automatically updates when you make changes. Your model can be ready for view, print, or use in your next project. Whether you create a simple house plan or more complicated skyscraper, architectural modeling tasks are just as quick and easy in AutoCAD Architecture 2020. In this release of AutoCAD Architecture, we've added new modeling and analysis features, such as interactive reports that can help you make sense of your model, and updated the core architectural modeling tools with an extensive set of improvements. Explore new interactive reports Discover new interactive reports in AutoCAD Architecture 2020 that help you explore your model. To make these reports more useful, we've rethought the way you access and use them. Access interactive reports from your model. The reports are now centralized and accessible through the Model Browser. You can start the interactive report with a double-click of any part of your model, or use the model's viewport to zoom into a specific area. Explore interactive reports with this model's viewport. In this model, you can start an interactive report by double-clicking on any part of the building. Use the interactive report to explore the model as though it were a map. Explore the components in an interactive report. The most important component in the interactive report is the Scale component, which will allow you to explore the model at any scale. Interactive reports are organized into tabs. The interactive report can also contain
