
Farstone Virtual Drive Pro 14 Keygen Generator

Create virtual disks from long paths, it's easy! Enter the full path, or (even easier) navigate to the path through the lists of drives and folders. Select a drive letter. Create a drive by entering a path or drive letters, choose to create a drive, then enter a name for the drive, and then click NEXT. Then enter the image name, size, etc. During disk creation, you can set options to install as the first boot disk and the second boot disk. Press "Next. After that, you can select the type of image: blank or already created earlier, then start creating the disk.
